

Case Study: Remote View Access with SureView®

PROVIDING THE REGULATORY CONNECTION DURING OPERATIONAL DISRUPTIONS

Product

SureView is a web-based tool that provides access to real-time test viewing and data storage.

Goal

Allow US regulators and internal stakeholders the ability to remotely monitor offshore BOP tests in real-time for Supermajor Operators during unprecedented disruptions due to COVID-19.

Results

1. Sureview provided multiple ways for the tests to be accessed with no additional bandwidth to the customer or regulator.

2. With split-screen mode, testing lineups and live tests could easily be viewed in real-time, on any device.

3. Positive feedback from all stakeholders regarding how quickly IPT Global responded in meeting this challenge with proven and approved technology.
